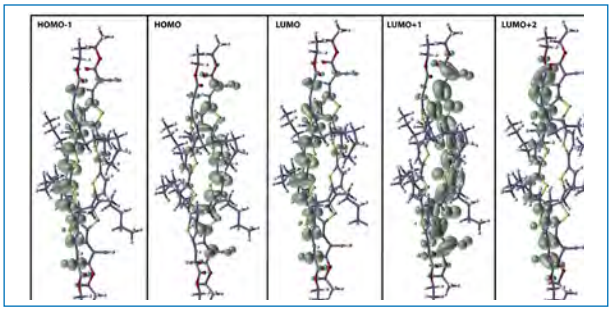
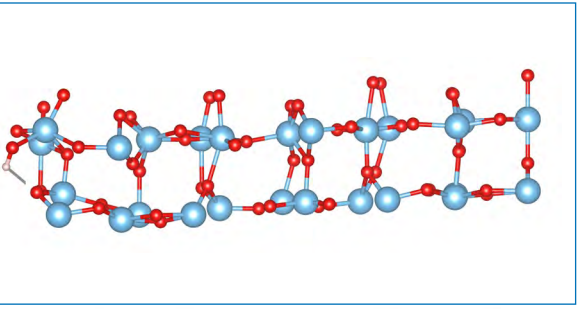
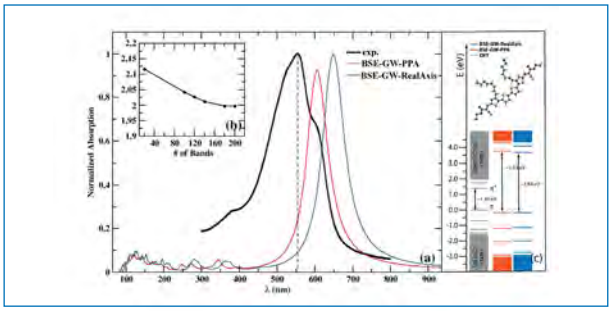
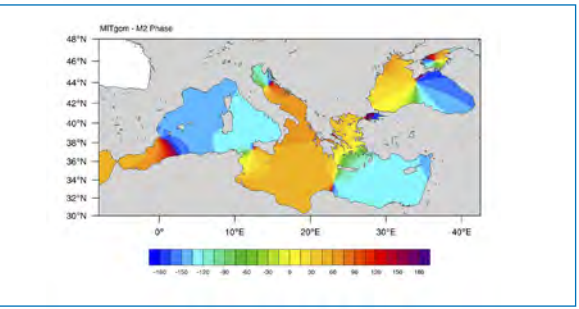
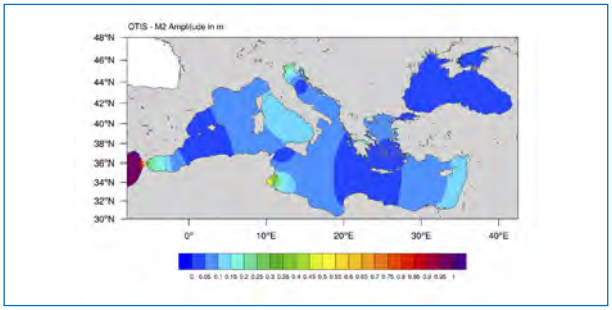
High Performance Computing on CRESCO infrastructure: research activities and results 2016

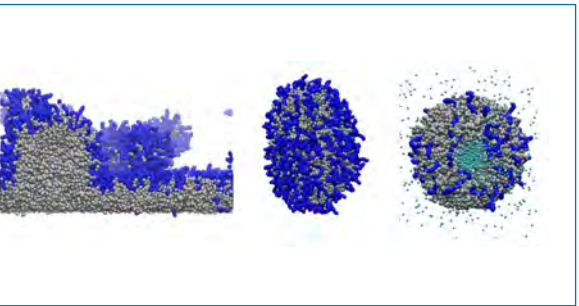












November 2017

High Performance Computing on CRESCO Infrastructure:
research activities and results 2016

Contributions provided by a selection of users of the CRESCO infrastructure

Scientific Editor: *Michele Gusso,* ENEA, DTE-ICT-HPC, Brindisi Research Centre

Acknowledgements: We wish to thank *Gianclaudio Ferro* for providing the Reporter system (http://hdl.handle.net/10840/5791) to collect the contributions and to build the Volume

Cover: *Amedeo Trolese*, ENEA, DTE-ICT-PRA, Frascati Research Centre

ISBN: 978-88-8286-362-3

Contents

Foreword *5*

M-TraCE: the development of a new tool in CRESCO-HPC environment for high resolution elaboration of backward trajectories
L. Vitali, M. D'Isidoro, G. Cremona, E. Petralia, A. Piersanti, G. Righini *6*

Atmospheric pollution trends simulated for the period 1990–2010 in Europe: EURODELTA - Trends project
M. Adani, G. Briganti, A. Cappelletti, M. D'Isidoro, M. Mircea *10*

The I/O benchmarking methodology of EoCoE project
S. Luehrs, A. Funel, M. Haefele, F. Ambrosino, G. Bracco, A. Colavincenzo, G. Guarnieri, M. Gusso, G. Ponti *16*

The effect of hydrostatic pressure on the structural and superconducting properties of A15 Nb3Sn
R. Loria, G. De Marzi *23*

Organocatalytic Coupling of Bromo-Lactide with Cyclic Ethers and Carbonates
L. Cavallo, L. Caporaso, L. Falivene, R. Credendino *29*

Ab initio formation energy of hydrogenated graphene oxides
F. Buonocore, N. Lisi *33*

The role of plant phenology in stomatal ozone flux modelling
A. Anav, A. De Marco *40*

Calibration of the high resolution regional earth system model (RegESM) over the Med-CORDEX domain
M. V. Struglia, S. Calmanti, A. Carillo, A. Dell'Aquila, E. Lombardi, G. Sannino *43*

A neural network for molecular dynamics simulations of hydrogenated amorphous silicon
M. Gusso, J. Behler *47*

Inter-layer synchronization in non-identical multilayer networks
I. Sendina-Nadal, I. Leyva, R. Sevilla-Escoboza, R. Gutiérrez, J. M. Buldú, S. Boccaletti *52*

FARO2.0 - A renewed gateway to ENEAGRID resources
A. Mariano, G. D'Amato, F. Ambrosino, G. Aprea, F. Buonocore, M. Celino, A. Colavincenzo, M. Fina, A. Funel, S. Giusepponi, G. Guarnieri, F. Palombi, S. Pierattini, G. Ponti, G. Santomauro, G. Bracco, S. Migliori *60*

Cloud infrastructure for scalability and high availability in business ICT applications
A. Mariano, F. Beone, A. Scalise *66*

Analysis of diffraction pattern for cadmium sulfide nanocluster by using Debye scattering equation
E. Burresi, M. Celino, L. Tapfer *72*

Theory and modeling of energetic particle driven instabilities
S. Briguglio, G. Fogaccia, V. Fusco, G. Vlad, X. Wang, T. Wang *78*

Neutron Transport analysis in DEMO in-vessel components
R. Villari, D. Flammini, F. Moro *86*

Electronic excitations in small oligothiophene molecules
F. Gala, G. Zollo *90*

Monte Carlo simulations supporting safety studies of PWR's and irradiation tests in TAPIRO research reactor
P. Console Camprini, K. W. Burn *100*

Nuclear responses in the ITER IVVS port cell
D. Flammini, F. Moro, R. Villari *105*

Edge modeling with SOLEDGED2-EIRENE code in RFX-mod and TCV fusion devices
P. Innocente *109*

Ab-initio study of the c-Si/a-Si:H interface for PV technology
S. Giusepponi, M. Celino, M. Gusso, U. Aeberhard, P. Czaja *113*

Molecular dynamics of GeO2: Car-Parrinello simulations in the range 10-4000 K
G. Mancini, M. Celino, A. Di Cicco *117*

Development of the new circulation forecast model for the Mediterranean Sea
G. Sannino, A. Carillo, A. Bargagli, E. Lombardi *122*

Computational design and validation of a reconfigurable three-dimensional DNA nanostructure
F. Iacovelli, M. Falconi *126*

Calculation of correction factors for solid-state detectors in radiotherapy photon beams
M. Pimpinella, L. Silvi *133*

Hydrogen interaction with TiO2 surface
R. Vujasin, B. Paskaš Mamula, J. Grbovic Novakovic, N. Novakovic *137*

An alternative use of prompt-Self Powered Neutron Detectors: spectral-deconvolution for monitoring high-intensity neutron fluxes
L. Lepore, R. Remetti, A. Pietropaolo *141*

Neutronic analyses in support of the WCLL DEMO design development
F. Moro, D. Flammini, R. Villari *149*

Report on CFD simulations of LOVA (Loss of vacuum accident) with ANSYS CFX 17.0 EUROfusion engineering grant safety analysis
F. Tieri *154*

Quantitative in situ gamma spectrometry in contaminated soil
M. Altavilla *158*

Influence of mass media in the Naming Game
F. Palombi, S. Ferriani, S. Toti *161*

Forces exerted by a solitary wave on horizontal cylinder
L. Gurnari, P. Filianoti *167*

High pressure premixed CH4/H2-Air flames
D. Cecere, E. Giacomazzi, N. Arcidiacono, F. R. Picchia *172*

Definition of a figure of merit for the optimization of ENEA NAI device
R. Remetti, G. Gandolfo, L. Lepore, N. Cherubini *179*

Structure of metal oxide nanoclusters from ab-initio computation
R. Grena *185*

Smagorinsky dynamic model for large-eddy simulation of turbulence
G. Rossi, D. Cecere, E. Giacomazzi, N. M. S. Arcidiacono, F. R. Picchia, B. Favini *189*

Characterization of MCL1 inhibition via Fast Switching Double annihilation technology on the CRESCO3 cluster
P. Procacci *195*

DPPC biomembrane solubilization by Triton TX-100: a computational study
A. Pizzirusso, A. De Nicola, G. J. A. Sevink, A. Correa, M. Cascella, T. Kawakatsu, M. Rocco, Y. Zhao, M. Celino, G. Milano *202*

Variant discovery for Triticum durum variety identification
G. Aprea, A. Fiore, P. Pallara, G. Giuliano *207*

Molecular dynamics simulations of peptide-TIO2 interfaces
M. Polimeni, L. Petridis, J. C. Smith, C. Arcangeli *211*

Materials for energy in the framework of the european center of excellence EoCoE
M. Celino, S. Giusepponi, M. Gusso, U. Aeberhard, A. Walker, S. Islam, D. Borgis, X. Blase, M. Salanne, M. Burbano, T. Deutsch, L. Genovese, M. Athenes, M. Levesque, P. Pochet *216*

Cavity design for a cyclotron auto-resonance maser (CARM) radiation at high frequency
S. Ceccuzzi, G. Dattoli, E. Di Palma, G. L. Ravera, E. Sabia, I. Spassovsky *222*

First principle studies of materials for energy conversion and storage
M. Pavone, A. B. Munoz-Garcia, E. Schiavo *227*

Role of the Sub-surface Vacancy in the amino-acids adsorption on the (101) Anatase TiO2 surface: A first-principles study
L. Maggi, F. Gala, G. Zollo *233*

LES of heat transfer in an asymmetric rib-roughened duct: influence of rotation
D. Borello, A. Salvagni, F. Rispoli *238*

SOLEDGE2D-EIRENE simulations of the reference scenario of the M15-20 JET experiment
G. Rubino *242*
