

High Performance Computing on CRESCO infrastructure: research activities and results 2017

**High Performance Computing on CRESCO Infrastructure:
research activity and results 2017**

Contributions provided by a selection of users of the CRESCO infrastructure

Scientific Editor: *Marcello Galli*, ENEA, DTE-ICT-HPC, Bologna Research Centre

Acknowledgements: We wish to thank *Gianclaudio Ferro* for providing the Reporter system (<http://hdl.handle.net/10840/5791>) to collect contributions and to build the Volume

Cover: *Amedeo Trolese*, ENEA, DTE-Rete, Frascati Research Centre

ISBN: 978-88-8286-373-9

Contents

<i>1. Foreword</i>	5
<i>2. Sensitivity of stomatal conductance to soil moisture: implications for tropospheric ozone</i> <i>A.Anav, A.De Marco</i>	6
<i>3. Detection of TDNA insertions in Chlamydomonas reinhardtii after transformation mediated by Agrobacterium and electroporation</i> <i>P.Mini, O.C.Demurtas, S.Valentini, P.Pallara, G.Aprea, P.Ferrante, G.Giuliano</i>	9
<i>4. Ab initio optical properties study of metal decorated tetramerized pyridinic graphene</i> <i>F.Buonocore, O.Pulci, N.Lisi</i>	12
<i>5. Spatial disaggregation of residential wood combustion emission using different proxy and inventory nuts: sensitivity study</i> <i>M.Adani, G.Briganti, A.Cappelletti, L.Ciancarella, I.D'Elia, M.D'Isidoro, M.Mircea, A.Piersanti</i>	18
<i>6. Dynamics of poly(2-vinylpyridine) chains close to silica nanoparticles in nanocomposite system.</i> <i>S.Caputo, A.Pizzirusso, A.De Nicola, G.Munao', G.Donati, Y.Zhao, G.Milano</i>	22
<i>7. Study of transport of runaway electrons in the presence of MHD perturbations with the Hybrid MHD Gyrokinetic code.</i> <i>A.Casolari, S.Briguglio, G.Vlad</i>	26
<i>8. Code parallelization of the optimisation for the local transport's electrification.</i> <i>G.Chiapparo, M.Celino</i>	30
<i>9. Neutronic Transport Analysis through openings in in-vessel components in DEMO.</i> <i>A.Colangeli, D.Flammini, F.Moro, R.Villari</i>	35
<i>10. Monte Carlo simulation supporting safety studies of PWR's and irradiation tests in nuclear research reactors.</i> <i>P.Console Camprini, K.W.Burn</i>	39
<i>11. Atomistic Model of Mesoporous Organosilica Materials.</i> <i>A.De Nicola, A.Pizzirusso, Y.Zhao, G.Milano</i>	44

<i>12. Enhanced steam methane reforming simulation by means of the computational particle fluid dynamics (CPFD) method.</i>	
<i>A. Di Nardo, G. Calchetti, S. Stendardo</i>	50
<i>13. Neutronics Studies for the Novel Design of Lower Port in DEMO.</i>	
<i>D. Flammini, A. Colangeli, F. Moro, R. Villari</i>	54
<i>14. Modeling of energetic particle driven instabilities using hybrid magnetohydrodynamics-gyrokinetic codes.</i>	
<i>S. Briguglio, G. Fogaccia, G. Vlad, T. Wang</i>	58
<i>15. A First Numerical Experiment of High-Pressure Methane Oxy-Combustion in a Supercritical CO₂ Environment.</i>	
<i>E. Giacomazzi, D. Cecere, N. Arcidiacono, F.R. Picchia</i>	65
<i>16. A CFD simulation of a full-scale U-OWC breakwater.</i>	
<i>L. Gurnari, F. Filianoti, S. Camporeale, M. Torresi, F. Scarpetta</i>	69
<i>17. Ab-initio molecular dynamics study of c-Si/a-Si:H interface.</i>	
<i>M. Gusso, M. Celino, S. Giusepponi, P. Czaja, U. Aeberhand</i>	73
<i>18. Dynamical phase transitions in dissipative strongly-interacting atomic ensembles.</i>	
<i>C. Perez-Espigarez, I. Lesanovsky, J.P. Garrahan, R. Gutierrez</i>	77
<i>19. Monte Carlo modeling of d-t neutron generator: improvement and experimental validation of a MCNPX input deck.</i>	
<i>L. Lepore, G. Gandolfo</i>	81
<i>20. Dependence on pseudo-potentials of ab-initio molecular dynamics simulations of high temperature GeO₂.</i>	
<i>G. Mancini, M. Celino, A. Di Cicco, E. Covino</i>	89
<i>21. First principle surface conductivity and susceptibility of monolayer TMDs.</i>	
<i>M. Marsili, J.D. Elliot, O. Pulci</i>	94
<i>22. Study of advanced configurations on tokamak EAST with the EMC3-EIRENE code.</i>	
<i>C. Meineri</i>	99
<i>23. The ITER radial neutron camera in-port system: nuclear analyses in support of its design development.</i>	
<i>F. Moro, B. Esposito, D. Marocco, S. Podda, D. Flammini, A. Colangeli, R. Villari,</i>	103

24. Effective interactions in polymer nanocomposites.	
<i>G.Munao', A.Pizzirusso, A.De Nicola, S.Caputo, G.Donati, Y.Zhao, G.Milano</i>	107
25. Air quality modeling for assessment of health risks from industrial facilities. A study on a new-generation coal-fired power plant.	
<i>A.Piersanti, M.Adani, G.Briganti, A.Cappelletti, L.Ciancarella, G.Cremona, M.D'Isidoro, C.Lombardi, F.Pacchierotti, F.Russo, M.Spano', R.Uccelli, L.Vitali</i>	112
26. Calculation of beam quality correction factors for reference dosimetry in radiotherapy photon beams.	
<i>M.Pimpinella, L.Silvi, M.Pinto</i>	117
27. Free energies in TX-100/DPPC bilayers.	
<i>A.Pizzirusso, G.Munao', S.Caputo, G.Donati, A.De Nicola, Y.Zhao, G.Milano</i>	121
28. SAMPL6 host-guest blind predictions using a non equilibrium alchemical approach.	
<i>P.Procacci</i>	126
29. Validation campaign of neutronic codes for LFR systems on the CRESCO HPC infrastructure.	
<i>M.Sarotto, G.Grasso</i>	133
30. Emergent explosive synchronization in adaptive complex networks.	
<i>V. Avalos-Gaytan, J.A.Almendral, I.Leyva, I.Sedina Nadai, S.Boccaletti</i>	137
31. The regional earth system model RegESM: Design and evaluation over the MED-CORDEX domain during the ERA-interim period 1980-2012.	
<i>M.V.Struglia, S.Calmanti, A.Carillo, A.Dell'Aquila, E.Lombardi, G.Pisacane, G.Sannino, U.Turuncoglu</i>	142
32. Air quality modelling at the urban scale: the PMSS modelling system applied to a case study in modena within the CRESCO-HPC environment.	
<i>M.G.Villani, F.Russo, L.Vitali, M.Adani, L.Ciancarella, A.Piersanti</i>	146
33. Neutronic analysis for the design and integration of EC launcher in DEMO	
<i>R.Villari, D.Trombetta, F.Moro, D.Flammini, A.Colangeli</i>	151
34. Employing carbon nanotubes electrical properties to build new intelligent materials.	
<i>Y.Zhao, G.Donati, A.De Nicola, A.Pizzirusso, G.Munao', S.Caputo, G.Milano</i>	156

<i>35. The Franck-Condon effect on BT2N spectra: single and double molecule light absorption.</i>	
<i>G.Zollo, F.Gala</i>	<i>161</i>
<i>36. Coevolutionary Dynamics of Rock-Paper-Scissors Games with Three-agent Interactions</i>	
<i>F.Palombi, S.Ferriani, S.Toti</i>	<i>173</i>
<i>37. CRESCO6: technical specifications and benchmarks.</i>	
<i>The CRESCO ICT team.</i>	<i>179</i>
<i>38. Author Index</i>	<i>185</i>
